DETAILED ACTION***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-34 and 36 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,844,084. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are fully encompassed by the patented claims. The patent discloses compositions which are the same as, or overlap those, recited in the present claims. Additionally, the patent teaches that the spinel boules disclosed therein may be cut to form a flat surface (see col. 3, line 32, for instance). To form the flat with a desired orientation for a particular intended use would have been within the level of ordinary skill in the art. Accordingly, the claims are not seen to distinguish over the patent.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-34 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kokta (USPN 6,844,084).

5. Kokta teaches spinel boules and wafers, which may have compositions which are the same as those presently claimed (see abstract, for instance). Kokta further teaches that the boules may be cut to form a flat surface (col. 3, line 32), but fails to teach that the flat indicates an orientation of a cleavage plane, as presently claimed. However, to select an orientation for the flat is considered to be well within the level of ordinary skill in the art. Such endeavor may be undertaken, for instance, to provide for easier processing of the boule. Accordingly, the present claims are considered to be prima facie obvious in view of Kokta.
